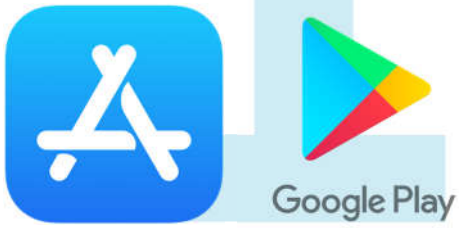
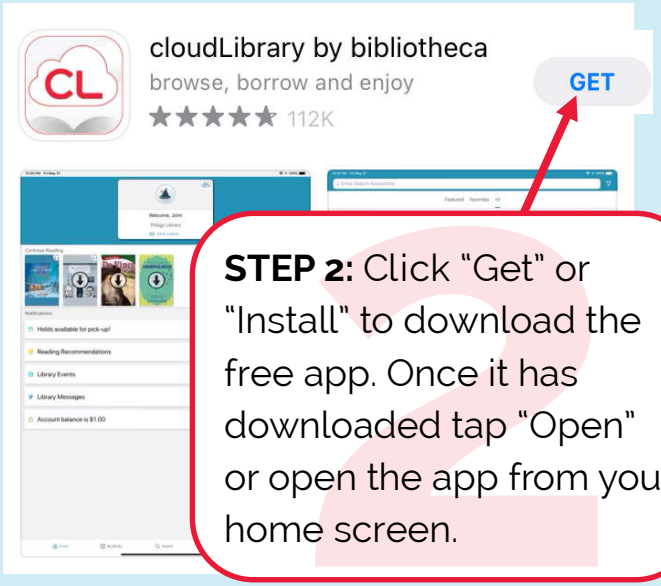
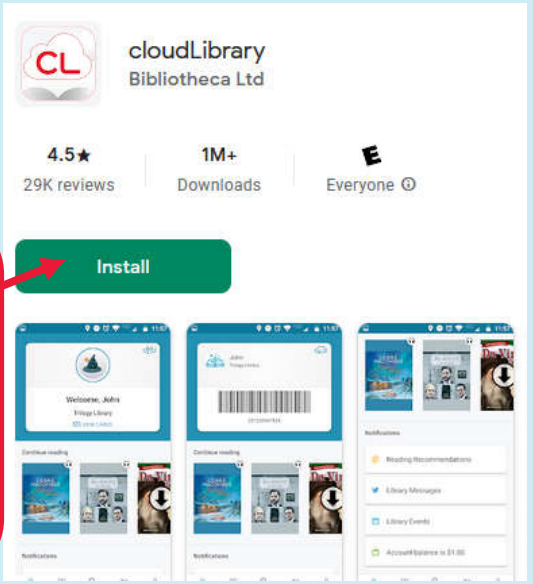
Getting Started with CloudLibrary

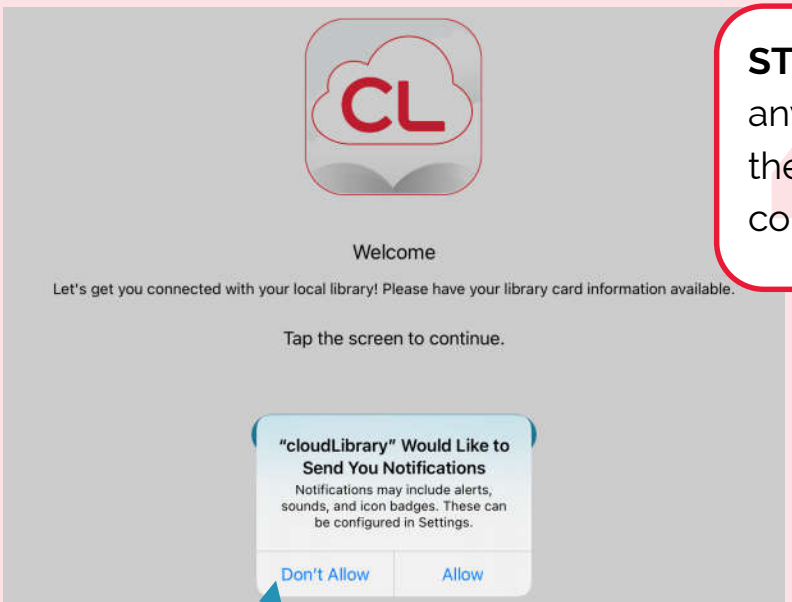
STEP 1: Visit the App Store or Google Play Store and Search for "CloudLibrary."





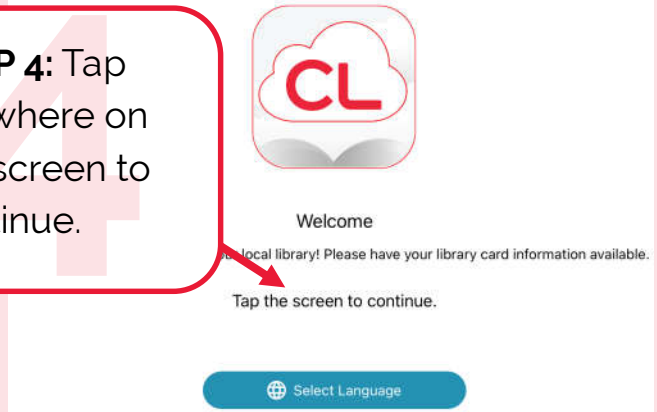
STEP 2: Click "Get" or "Install" to download the free app. Once it has downloaded tap "Open" or open the app from your home screen.



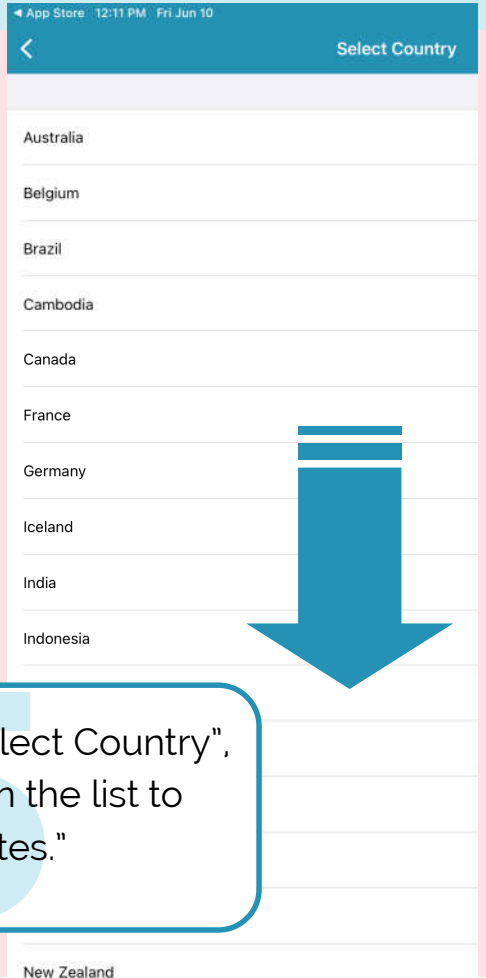


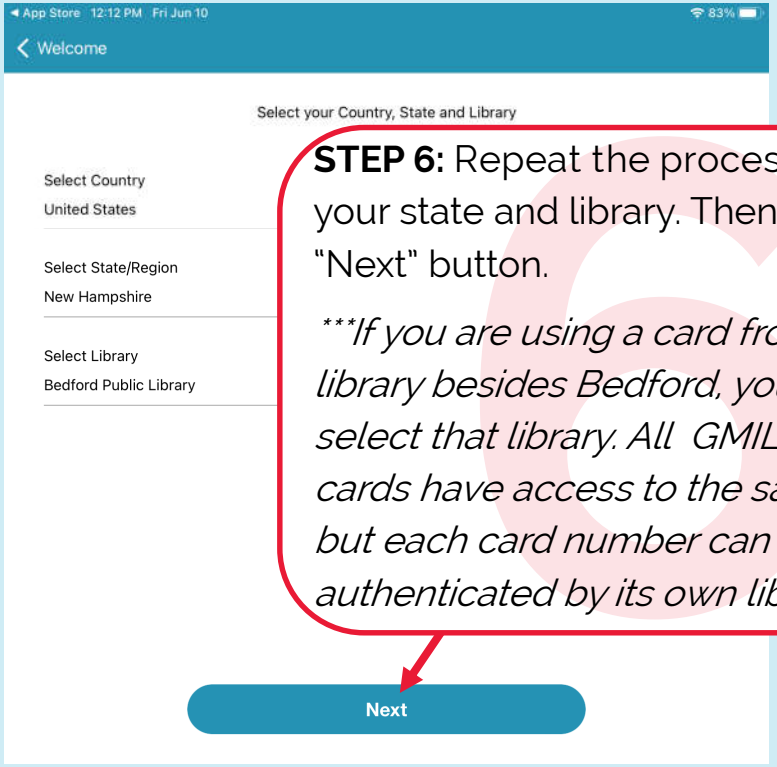
STEP 3: Choose whether or not to allow notifications. If you choose "Don't Allow", you can always allow them later in your settings.

STEP 4: Tap anywhere on the screen to continue.



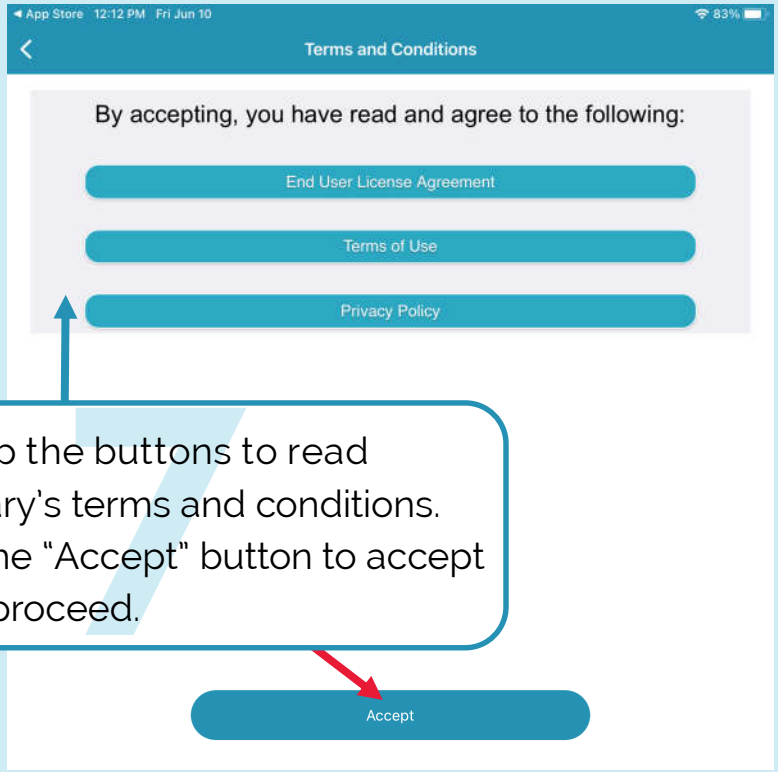
STEP 5: Tap "Select Country", then scroll down the list to find "United States."



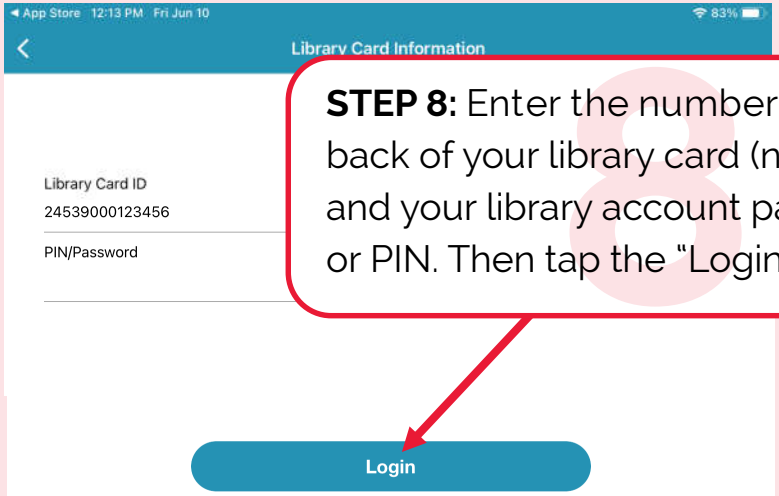


STEP 6: Repeat the process to select your state and library. Then tap the "Next" button.

****If you are using a card from another library besides Bedford, you must select that library. All GMILCS library cards have access to the same eBooks, but each card number can only be authenticated by its own library.****



STEP 7: Tap the buttons to read CloudLibrary's terms and conditions. Then tap the "Accept" button to accept them and proceed.



STEP 8: Enter the number from the back of your library card (no spaces) and your library account password or PIN. Then tap the "Login" button.

Success!

You are now signed in! Use the menu icons at the bottom of the page to find eBooks or eAudiobooks and start reading.
